# Coffee Silo Storage Systems

Let's get producing like pro's.

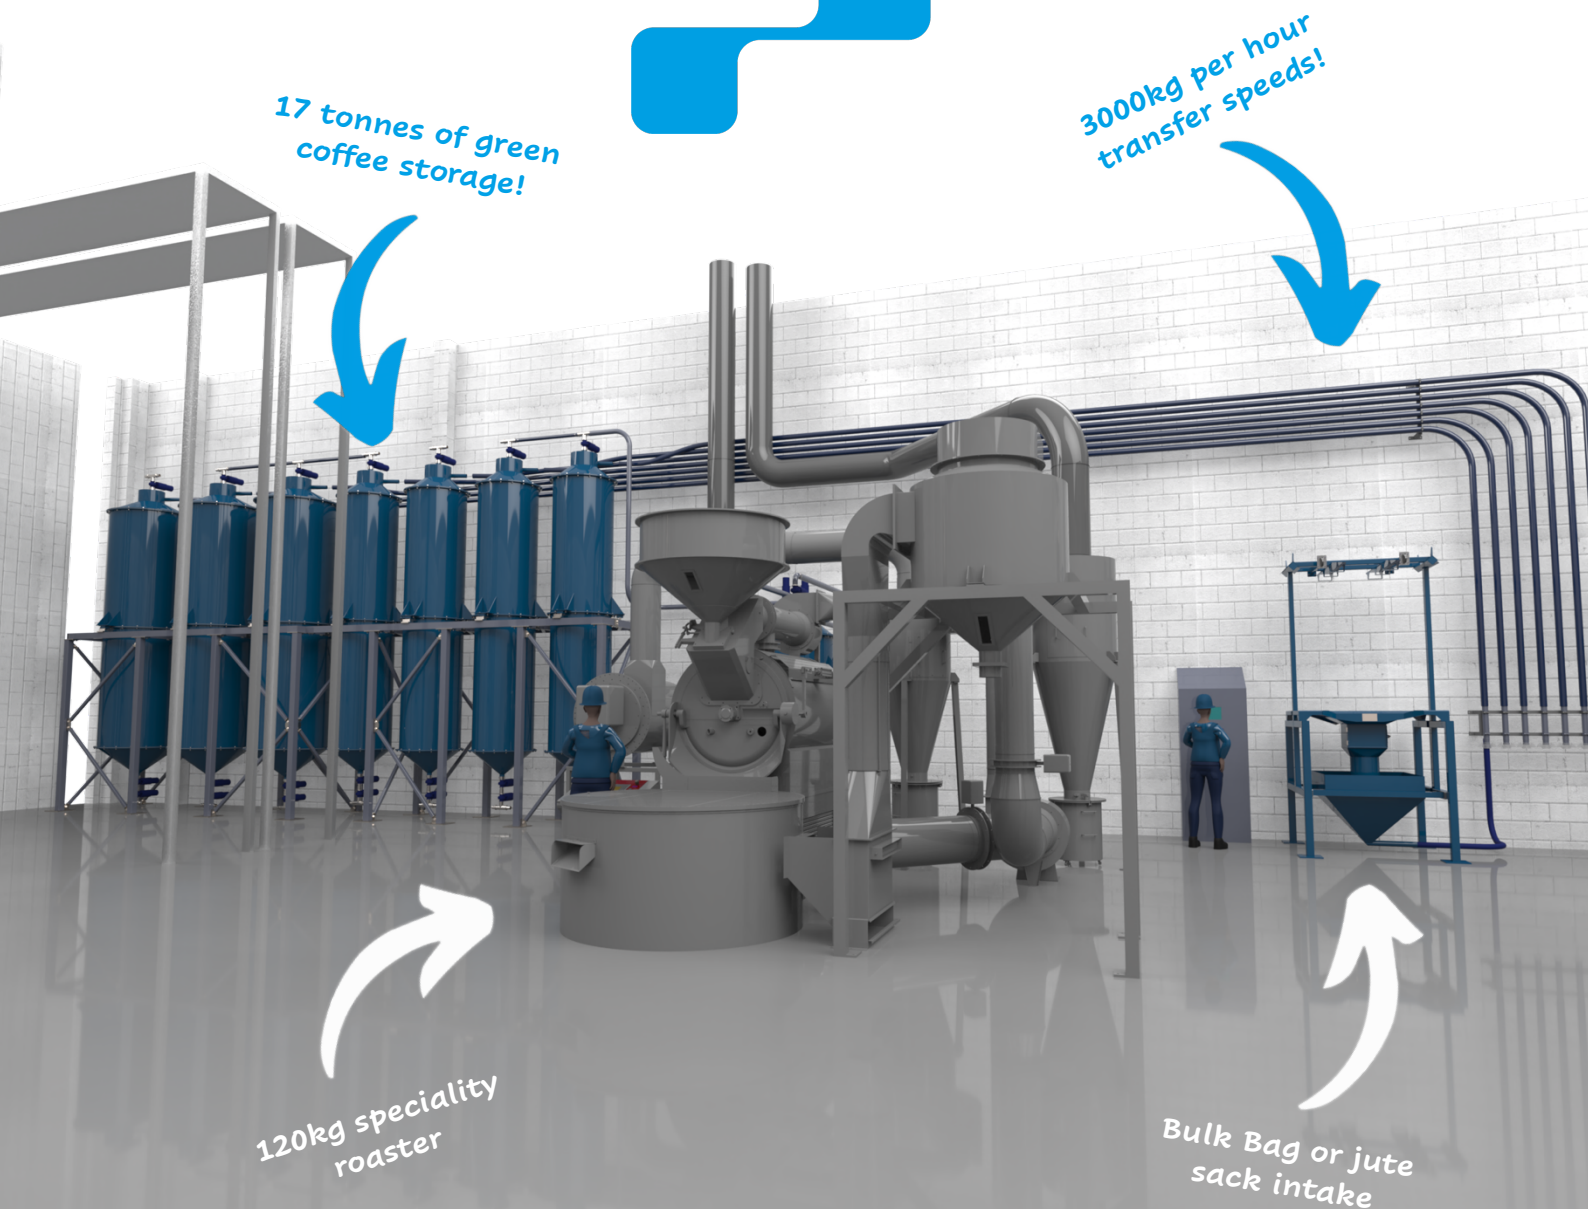

17 tonnes of green  
coffee storage!

3000kg per hour  
transfer speeds!

120kg speciality  
roaster

Bulk Bag or jute  
sack intake

# ” WELCOME

Back in 2020 we decided to turn our attention towards the coffee industry. We'd noticed an increase in interest from speciality roastery for hopper loaders and storage tanks.

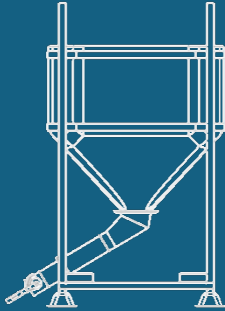

Production in a lot of roastery's still relied heavily on manually moving green coffee around.

So, we set out to solve the issue of back breaking work that is so commonly experienced in the coffee roasting community. Not with a magic pill, but with engineering.

We have worked in tandem with Roastery's to develop a range of products and systems that improve their way of working, removing the huge amounts of manual lifting and weighing.

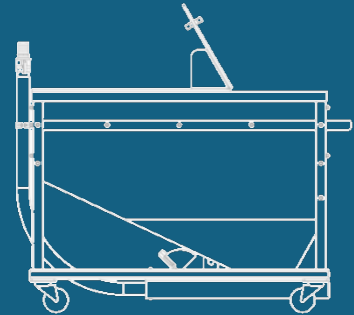

Even a 30kg roaster can demand up to 5 tonnes of green coffee per week!

# TABLE OF CONTENTS

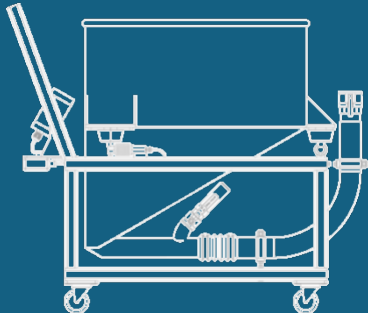

## BeanyBin Static

Storage for green or roasted coffee  
150L – 3000L capacity

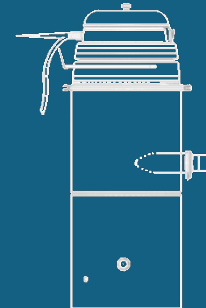

## BeanyBin Mobile

Mobile storage for green or roasted coffee  
150L – 800L capacity

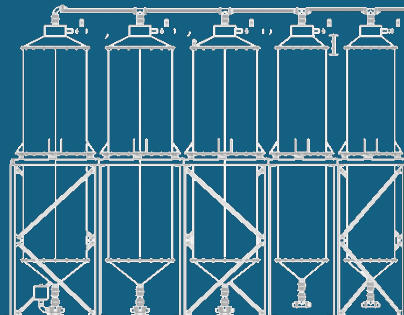

## BeanyBin Scale

Mobile weighable storage for green or  
roasted coffee. 150L – 800L capacity

## Hopper Loaders

Vacuum transfer units for green or roasted  
coffee. 300 – 1000 kg/hr rates

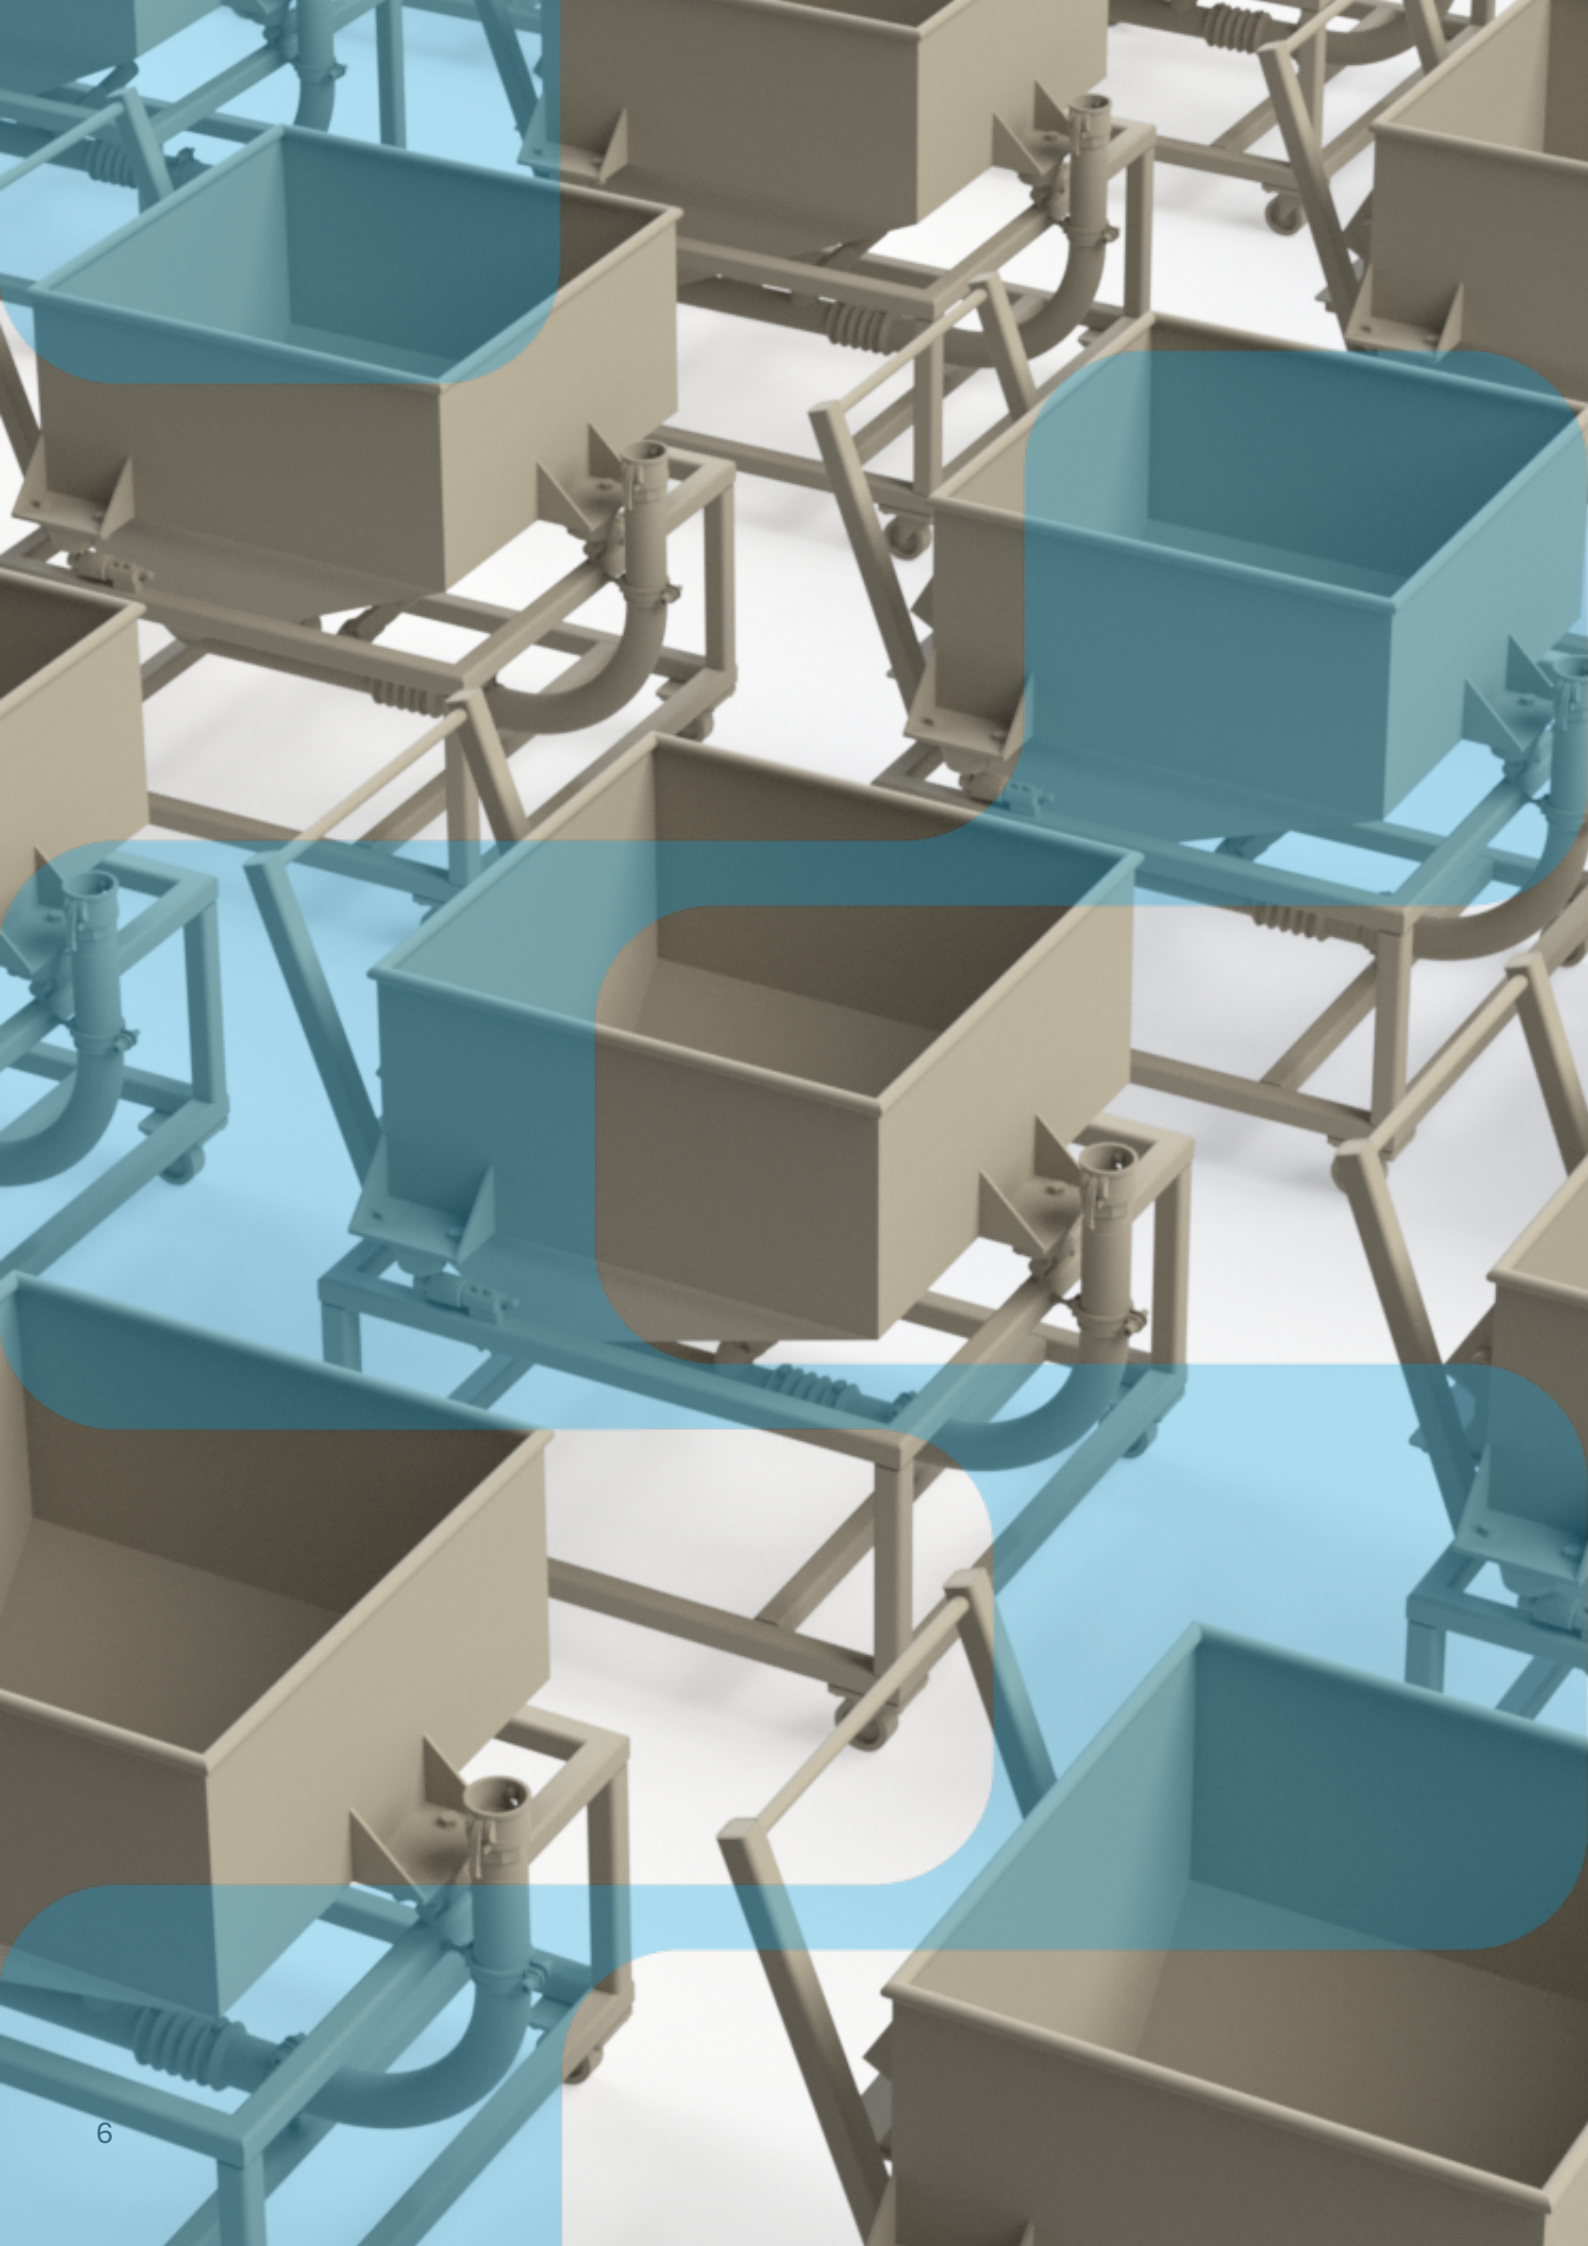

## Silo Systems

Vacuum transfer silos for green or roasted  
coffee storage, weighing and dosing.

products and systems.

# DESIGN AT THE CENTRE

**We are experts in bulk material handling, pneumatic conveying and batch transfer systems for powders and granules.**

**With experience spanning 40 years there is no production problem we haven't seen! Our in-house design & engineering team are always hungry to get stuck into a challenge.**

**Our solutions make your life easier by improving efficiency, reducing downtime, and letting you focus on the important parts of production – quality roasts.**

# BeanyBin Static

All the good stuff, in one place.

Store up to 2000kg of green coffee.

## Size's

150L | 300L | 500L | 800L  
1000L | 1600L | 2200L | 3000L

## Green Coffee

100kg | 200kg | 350kg | 600kg  
700kg | 1000kg | 1500kg | 2000kg

## What's it made of?

(you've got options)

Mild Steel & Painted,  
Stainless Steel,  
or Food Grade Plastic

Can be stored on pallet racking.

Comes with forklift channel as standard.

Manual "damper" style outlet valve.

Check out the video of the BeanyBin Static in action on our YouTube channel!

# BeanyBin Mobile

I like to move it, move it.

**Move up to 600kg of green  
coffee or 250kg of roasted!**  
(did we mention, all at once)

## Size's

150L | 300L | 500L | 800L

## Green Coffee

100kg | 200kg | 350kg | 600kg

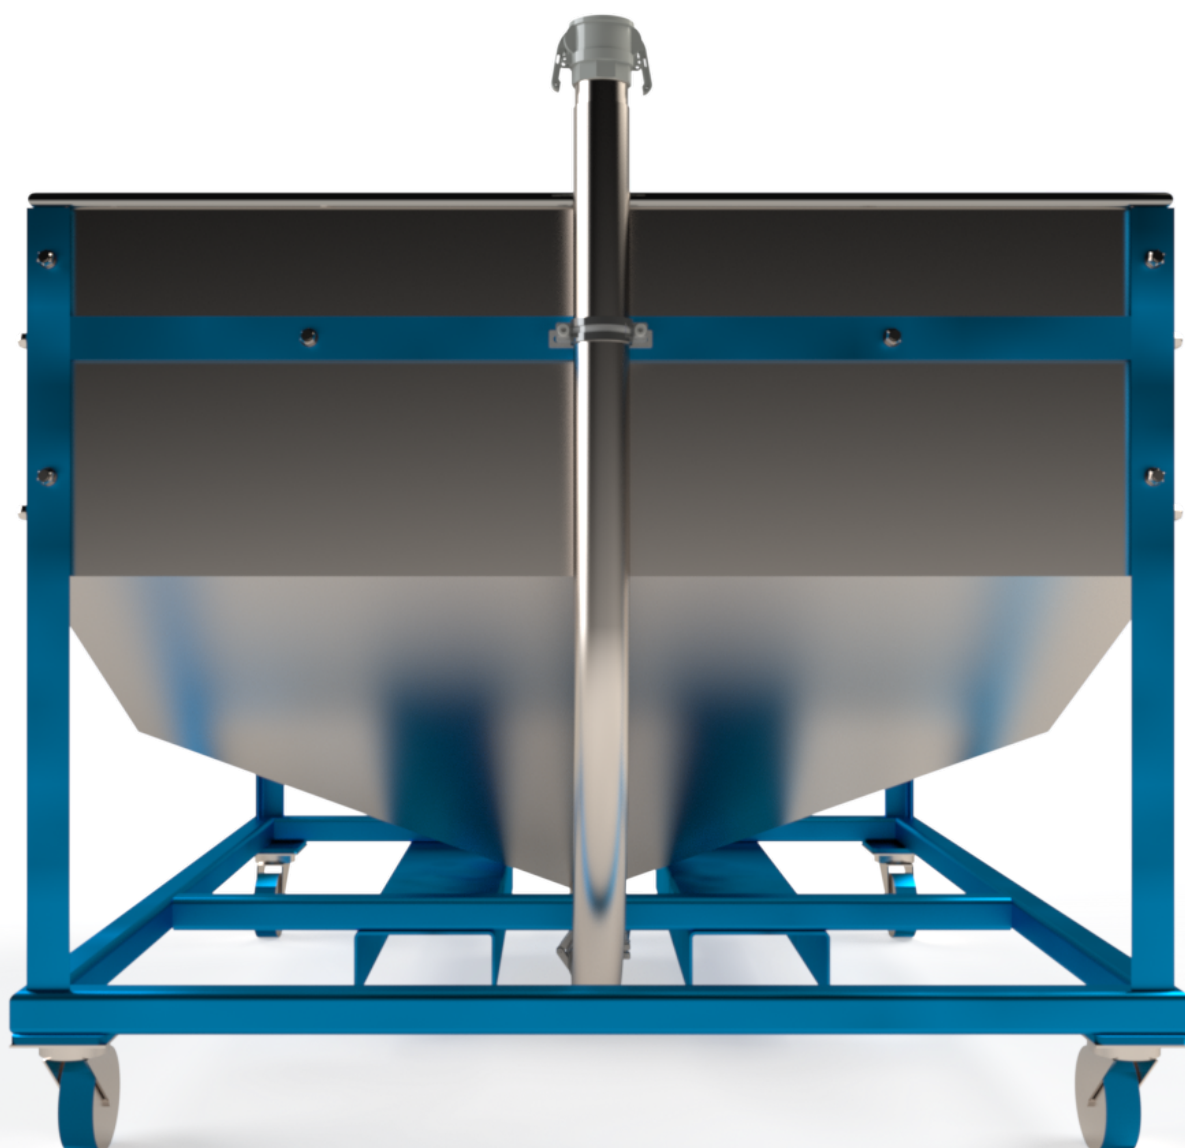

## Roasted Coffee

50kg | 100kg | 150kg | 250kg

Quick connect vacuum connection as standard.

All contact parts made from stainless steel as standard.

Forklift channels available on request.

## Size's

150L | 300L | 500L | 800L

## Green Coffee

100kg | 200kg | 350kg | 600kg

## Roasted Coffee

50kg | 100kg | 150kg | 250kg

Three accurate load cells & one battery powered weight read out.

Quick connect vacuum connection as standard.

All contact parts made from stainless steel as standard.

# BeanyBin Scale

Time for the weigh in.

**Weigh it straight out of the roaster and into the packing machine!**

(not a bucket in sight)

# Hopper Loaders

Suck it up.

## Speeds

300kg/hr | 500kg/hr  
800kg/hr | 1000kg/hr

Plug in and play (16amp plug)

Carbon and brushless motor options.

All contact parts made from stainless steel as standard.

Can be used with green or roasted coffee beans.

Used to load roasters, de-stoners, blenders and packing machines.

# Silo Systems

Where things get serious.

**Fully automated coffee silo filling, stock control and accurate batch transfers**  
Our intelligent software can handle all the heavy lifting.

Store up to 4000kg of green coffee  
in a single silo.

## Size's

700L | 1000L | 1500L | 2000L  
2500L | 3500L | 4000L | 5500L

## Green Coffee

500kg | 800kg | 1000kg | 1500kg  
2000kg | 2500kg | 3000kg | 4000kg

## Roasted Coffee

250kg | 350kg | 500kg | 700kg  
900kg | 1200kg | 1400kg | 2000kg

Mild Steel & Painted or Stainless Steel

Send coffee to any silo

Pull coffee from any silo

Easily keep an eye on stock

Remove all manual handling

Keep the roastery clean

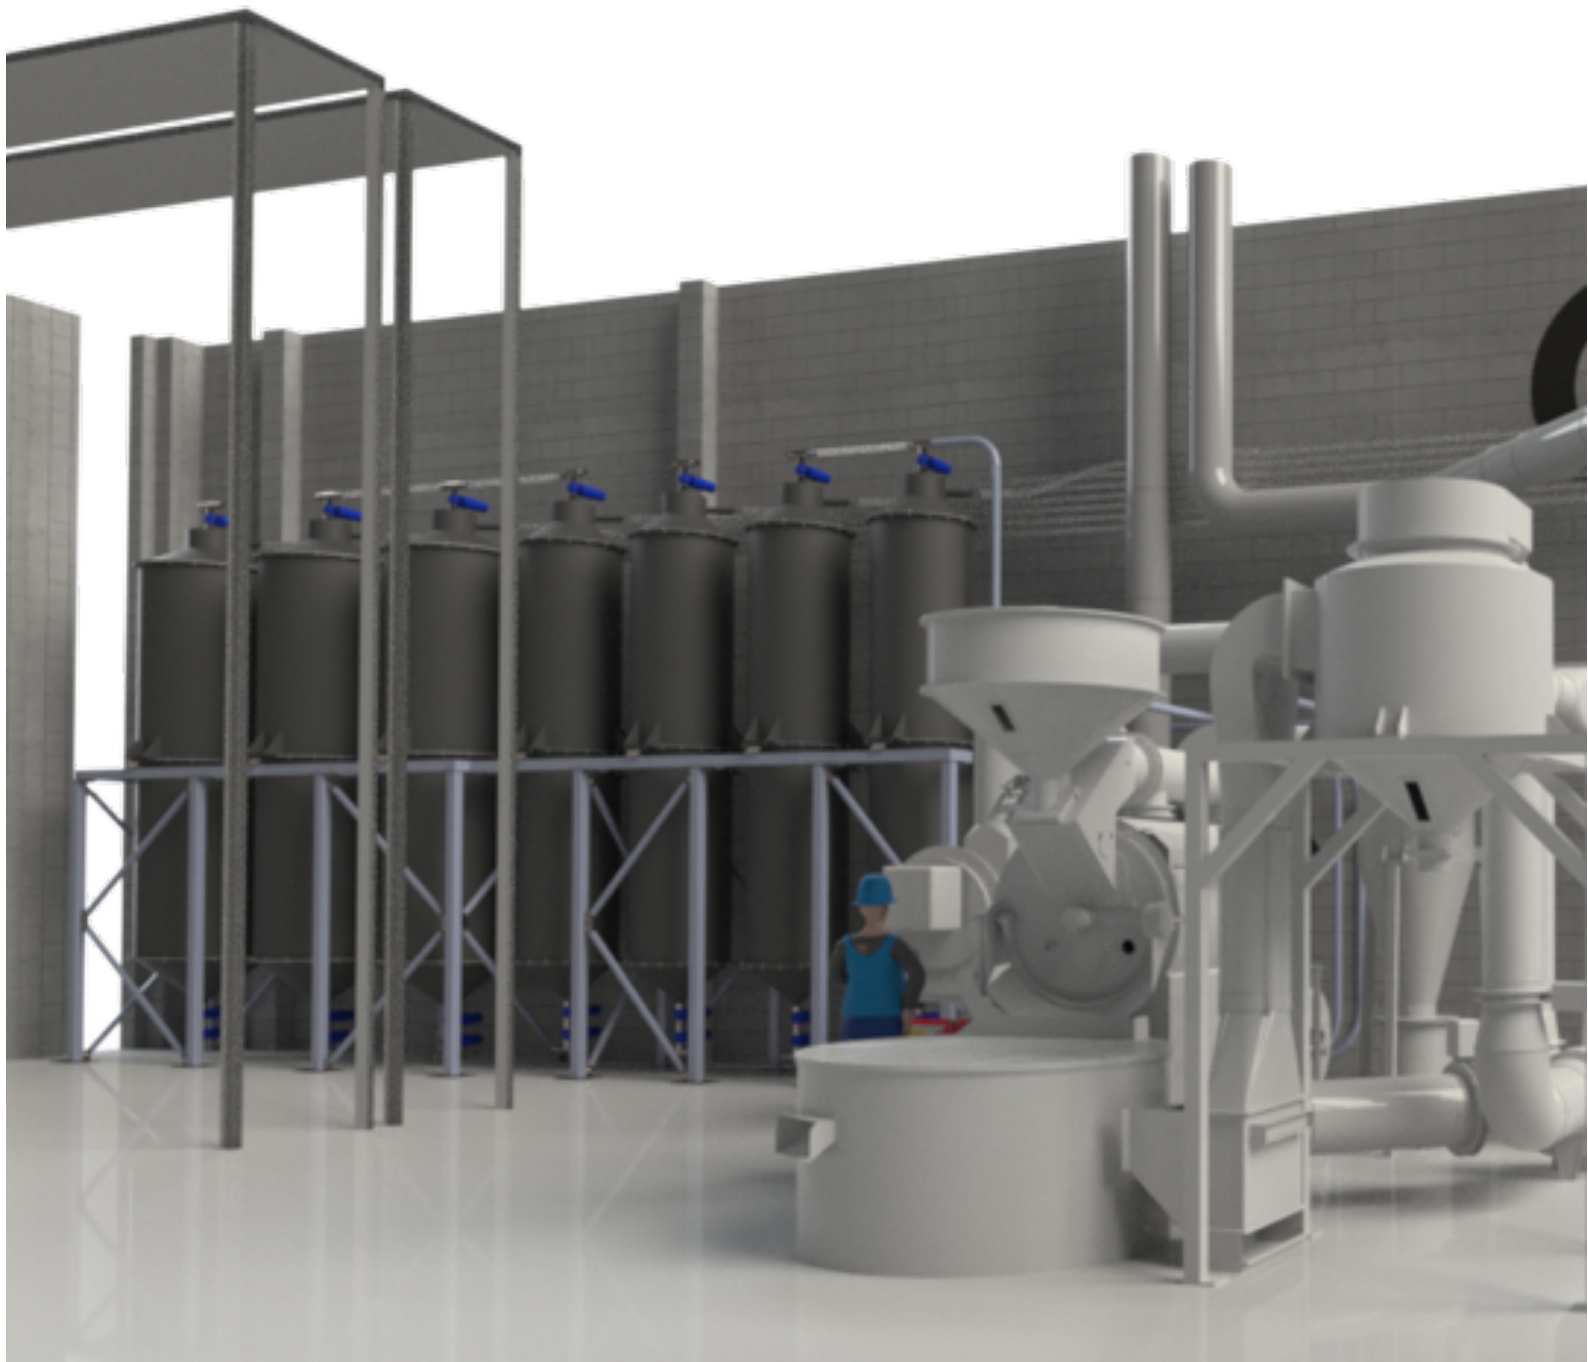

Improve health and safety

What more can you ask for?

# Imagine moving a 120kg batch to the roaster

without even lifting a finger

Apart from pressing the button, of course.

# WIN AS ONE

## **Work as a team**

Operate with empathy and care  
Live the power of 'we'

## **Inspire excellence**

Simplify the complex  
Move with speed and agility

## **Navigate our future**

Define the destination  
Be courageous in the face of uncertainty
